## How to enable DL Tool within Windows 11.

**Step 1 – Verify or set Internet Options. Sadly, add-ins are controlled by this feature.**

- Click Start and type Internet Options.
- Launch Internet Options.
- Click Advanced Tab.
- Locate Browsing section.
    - Enable option – Enable third-party browser extensions.
- Click Programs tab.
- Click Managed Add-ons.
    - Locate following add-ins. If disabled, enable them. If status shows NEW, click to enable.
        - DL Toolbar
        - DL Adv. Search
- Close Internet Options.

**Step 2 – Enable DL Toolbar**

- Open Document Locator.
- In the screen show below. In place of Document Locator (Address bar), enter Control Panel and hit enter.

- Control Panel will appear.
- In address bar, hit up arrow. See image.

- Doing so will show the Classic File Explorer interface. See image.

- Choose View tab.
- Under Options is a drop-down arrow that lets you choose 'DL Toolbar'.
- Close Classic File Explorer.
- Done.
